Panama City, Condado del Rey,
P.H. Kings Park, Torre 200 5f

I am a third-year student in Software Development and Management at the Technology University of Panama, passionate about technology and software development. My goal is to become a fullstack developer, capable of handling both the frontend and backend of web applications. I excel in problem-solving, teamwork, and adapting to new technologies and agile methodologies. I am committed to continuous learning and improving my skills to contribute effectively to innovative and challenging projects. My experience includes the use of various tools and programming languages, as well as database management and user interface design.
